Preparation for your Roof or Siding Project

Thank you for choosing Blue Ox Exteriors, LLC. We strive to keep our job sites free from hazards and debris. Due to the large amount of material and nails removed, please use caution if you are present during the construction process. Please review this list ensuring you & your home are ready for construction.

Day before we build:

- Remove any expensive or important art, pictures, china, etc from walls or cabinets. The vibration caused by nail guns could cause items to fall.
- Move lawn furniture, grills, plants, etc away from house.
- Unlock any gates - our crew needs access to all parts of your yard.
- Cover/remove valuables in attic. Nails & shingle granules can fall through cracks in the wood on your roof.
- If your garage does not have a finished ceiling remove or cover any valuables and cars.
- Keep driveway clear for material drop.

Day of Build:

- Use caution if entering or exiting house, do not stand directly beneath gutters or roof overhangs.
- Keep pets indoors or confined 20 feet from house.
- Park vehicles away from house. Keep driveway clear.
- Disarm any security system as vibrations could set it off.
- Weather may delay your build at the discretion of our crew and managements judgment.
- Blue Ox Exteriors is not responsible for nail pops in sheet rock, debris falling into attic or uncovered garage spaces, including damage to electrical or ac lines run too close to substrate as they would not have been installed per building code.

After Build: Please check the following before letting children or pets outside:

- Ensure any gates are closed.
- Magnetic rollers and wands are used to aid in the process of nail and debris cleanup, it is possible a few nails may remain embedded in grass, dirt, rocks etc.
- Remaining Materials will be picked up.
- Your roof will be inspected by your municipality. Allow up to 2 weeks, depending on the city.

Thank you,
Blue Ox Exteriors, LLC
